

ANJAN KUMAR DAS

Aspiring Blockchain Engineer | Software Engineer | CSE Undergraduate

: Rajshahi, Bangladesh | : +880-1701928549 | antudas954@gmail.com | : linkedin.com/in/Anjan
github.com/Anjaankdas

CAREER SUMMARY

Computer Science and Engineering student at Varendra University with a solid foundation in C, C++, Java, and JavaScript. Experienced in developing academic software projects, practicing competitive programming, and participating in robotics projects and competitions. Currently expanding expertise in blockchain development with a focus on Solidity and smart contract development. Eager to contribute technical skills, problem-solving abilities, and a strong willingness to learn as a Software Engineer or Blockchain Engineer.

EDUCATIONAL QUALIFICATIONS

Examination	Institution / Board	Year	Result
B.Sc. in CSE	Varendra University	2026	CGPA: 3.60 /4.00
H.S.C.	[Nawab Siraj-Ud-Dowla Government College], [Rajshahi]	2020	GPA: 5.00/5.00
S.S.C.	[Natore Government Boy's High School], [Rajshahi]	2018	GPA: 5.00/5.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, AI/Machine Learning, Computer Networks, Software Engineering, Web Technologies

TECHNICAL SKILLS

Programming Languages: C, C++, Java, JavaScript (Basic)

Blockchain: Solidity (Learning), Ethereum (Learning

Web Technologies: HTML, CSS, JavaScript (Basic)

Tools & Platforms: Git, GitHub, VS Code, Remix IDE

Databases: MySQL, IPFS

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP)

ACADEMIC PROJECTS

Tree Vibration Monitoring System

Technologies: ESP32, ADXL345, Arduino IDE, Embedded C

- Developed an IoT-based system to detect and analyze subtle tree vibrations using ESP32 and ADXL345.
- Processed real-time vibration data for tree health monitoring and environmental analysis.
- Explored applications in smart agriculture, forestry research, and non-destructive tree health assessment.
- Converted vibration signals into meaningful data and audible sound for plant bio-acoustics research.

Blockchain-Based Secure Medical Record Exchange (Thesis) [GitHub Link]

- Designed a patient-owned medical data exchange system using a Solidity smart contract (deployed on Sepolia) with on-chain consent management (grant/revoke access) and audit logging.
- Implemented client-side AES-256-GCM encryption before pinning records to IPFS, anchoring only the CID and hash on-chain.
- Built an AI diagnosis component (XGBoost, ROC-AUC 0.80) with a federated learning setup simulating 3 clients to preserve data privacy.

TRAINING & CERTIFICATIONS

- Solidity Smart Contract Development (Ongoing) — Cyfrin Updraft (Patrick Collins)
- The Complete JavaScript Course 2024: From Zero to Expert! — Udemy (Jonas Schmedtmann)

EXPERIENCE / INTERNSHIPS

Maloncho (2024 January - July)

- Managed Facebook marketing campaigns and promotional content.
- Increased audience engagement through social media strategies.

Chorcha (2025 online)

- Entered and maintained data with a high level of accuracy.
- Organized and updated digital records and databases.

ACHIEVEMENTS & EXTRA-CURRICULAR ACTIVITIES

- Qualified for the **ICPC Preliminary Contest 2023**.
- Developed robotics projects, including **Robo Soccer Robot, Line Following Robot (LFR), and Drone [Varendra University Robotics society]**.
- Developed an **IoT-based Air Pollution Monitoring System** under the supervision of **Mohammad Faisal Al-Naser**, Lecturer, Varendra University.
- Participated in the **Line Bot Pursuit** event at **Tech-MAYHEM 2023**, RUET.
- Active member of the **Varendra University Robotics Club**.

LANGUAGES

Bangla: Native
English: Fluent (reading, writing,), speaking
